

## We Want Your Opinion.

### Are you someone who has experience with using Opioids?

We are a team of designers, health care professionals, and non-profit workers who are working together to create a space for people to go after they're discharged from the emergency room for an overdose.

You're the expert, not us. We want to learn as much as possible from your experiences and perspectives with using opioids and the kinds of care services you have received. We will be exploring topics related to care team composition, therapeutic interventions, and physical spaces.

#### Are you eligible?

- Are you someone who has experience using Opioids and has received some kind of care?
- Are you over 18 years old?
- Do you speak English?
- Do you wish to share your perspective and experience on the care you have received?

#### Interested?
