

We Want Your Opinion.

Do you deliver care to people who use Opioids?

We are a team of designers, health care professionals, and non-profit workers who are working together to create a space for people to go after they have been discharged from the emergency room for an overdose.

The aim of this research is to learn about your experience caring for people who have used or use Opioids, from a team composition, therapeutic intervention, and physical space perspective.

Are you eligible?

- Are you a healthcare professional who cares or has cared for persons who use Opioids?
- Are you over 18 years old?
- Do you speak English?
- Do you wish to share your perspective on care you have provided?
